Professional Summary

Senior Unity Game Developer with 4+ years of experience designing, developing, optimizing, and publishing mobile games. Specialized in scalable gameplay systems, AI architecture, performance optimization, and full production lifecycle ownership. Proven ability to work independently as a solo developer while also collaborating effectively within teams.

Core Technical Skills

- Unity Engine (2D/3D Development)
- C#, C++, C (Strong OOP/OOD Concepts, SOLID Principles)
- Gameplay Systems & Combat Mechanics
- Custom AI Systems (Traffic, Pedestrian, Pathfinding)
- Multithreading & Async Programming (Tasks, UniTask, Coroutines)
- ScriptableObject-Based Architecture
- Controller Mechanics (FPS, TPS, Vehicle, New & Old Input Systems)
- Animation & Cinematics (Rigging, Root Motion, Animator, Cinemachine)
- Level Design (ProBuilder, Blender, Terrain System, UV Editing)
- Performance Optimization (Batching, Light Baking, Occlusion Culling)
- Debugging & Investigation (Firebase Crashlytics, Logcat, Backtrace)
- Ads Monetization (AdMob, Firebase, Google Play Services Integration)
- Git Version Control

Professional Experience

Senior Unity Game Developer – BrilliantGamez (2023 – Present)

- Sole developer responsible for complete game lifecycle from concept to Play Store release.
- Designed scalable gameplay systems including combat, progression, AI behaviors, and open-world mechanics.
- Built custom traffic and pedestrian systems optimized for mobile performance.
- Integrated monetization systems using AdMob and Firebase Analytics.
- Applied advanced optimization techniques to reduce CPU load and memory usage.
- Published Titles:

1. Bike Rider Life: Love & Dreams — Open World / Simulation
[View on Play Store](#)
2. Crazy Racing Master: Car Game — Racing
[View on Play Store](#)
3. Traffic Rider: Bike Delivery — Delivery / Traffic Simulator
[View on Play Store](#)
4. Car Stack Runner 3D: Car Games — Arcade / Stacker
[View on Play Store](#)
5. Flying Action Hero Open World — Action / Open World
[View on Play Store](#)
6. Scary Bird Game: Flying Games — Casual / Arcade
[View on Play Store](#)

Associate Unity Game Developer – Glixen Technologies (09/2022 – 12/2023)

- Collaborated with designers and developers on multiple simulation and hyper-casual games.
- Temporarily led small teams and coordinated feature implementation.
- Implemented controller systems (FPS, TPS, Vehicle) and core gameplay mechanics.
- Conducted debugging and crash investigation using Crashlytics and Logcat.
- Contributed to major game updates including Rolling Sky, Scary Teacher, and Crop Corn Field.

- Published Titles:

7. Rolling Sky: Balance Ball Race — Hyper Casual / Arcade
[View on Play Store](#)
8. Crop Corn Field: Tractor Games — Farming Simulator
[View on Play Store](#)
9. Build: City Building Games — City Builder / Simulation
[View on Play Store](#)
10. Doctor Rush — Arcade / Idle (Reference)
[View on Play Store](#)

Final Year Project – Math Trilogy (Educational Game)

Designed and developed an educational game for children featuring multiple math-based mini-games. The system collected user performance data to allow parents to track learning progress and identify areas for improvement.

Education

Bachelor of Science in Computer Science – University of Central Punjab (2017 – 2022)

A-Levels – Beaconhouse ALJT, Lahore (2014 – 2017)

O-Levels – Beaconhouse School System, Lahore (2010 – 2014)

Additional Information

Languages: Urdu (Native), English (Professional)

Date of Birth: May 3, 1994
